ENVIRONMENTAL ASPECTS AND IMPACTS QUALITATIVE MATRIX

(A) Probability Rating : (5-1)		(B) Severity Rating : (5-1)		(C) Control Rating : (5-1)		(D) Detection Rating : (5-1)	
SCORE	CRITERIA	SCORE	CRITERIA	SCORE	CRITERIA	SCORE	CRITERIA
1	Unlikely	1	Doesn't affect environment/ positive environmental effect	1	Available & effective	1	Immediately
2	Once in a week/ month	2	Easily recoverable or self-recovering, and there is no lasting impact	2	Control Mechanism is in place. But not reliable	2	Within an hour
3	Once in a day	3	Damage is short term and always repairable	3	Monitoring is not effective.	3	Within a day
4	Several times a day	4	Damage is not permanent or is only medium term	4	Controls are defined. But not implemented	4	Within a month
5	Continuously	5	Permanent damage / long-term environmental damage / impacts.	5	Controls are not defined. (Absence of effective control)	5	Within quarterly or more

IMPACT RATING:

SCORE	ACTION	IMPACT LEVEL
1 TO 30	No action required	VERY LOW
RPN > 30	Needs immediate management attention. Situation requires correction, corrective action (where required). Monitoring and Measurement of such scenario's is required in case operational control procedures are inadequate	HIGH
Emergency situation		HIGH
LC/ IPC/ BC		HIGH

Rating Score: Risk Rating à A X B X C X D

The aspect having the RR value above 30 are considered to be significant impacts. Control measures are been carried for reducing the significant impact rating.
